

Date: 1/29/2018 - 2/4/2018 Week4

***This week***

Almost done. The last part left, I think I need to submit the weekly report first.

Done:

1. Find the number of times each cell appears in that report
2. Show the cells such way that they can be sorted by their names and how many times they appeared
3. Part of  
Sort the cells based on how much they contributed in the negative paths.

Haven't done:

1. Total delay
2. GUI Table

***Next week***

1. Working on last coding.
2. Making a GUI table.

***Issues***

1. Learning the Python regular expression.
